## Academic Projects

Title : BlogHub

Platform : J2EE

Duration : 1 Month

Description : We are creating a blogging website, which will allow users to create account, create and post blogs as well as build a community and the people in community will be able to make comments in the blog post. We will give the user a filter to search blogs as per his wish as he can manage the blogs which will be shown to him and those blogs will be shown to him which are latest. The user will be also getting a feature where he wants to write or publish a blog as we will integrate chatgpt api, so that after passing a particular blog the user will get some key points which he can include in his blog and make it more interesting.
